Money Power

Get the facts about loans, interest and income.

Money Power is a financial calculator that will answer questions about future income, loans and interest costs.

If you'd like to see the possible results of a financial decision before you make it, Money Power will automatically handle the complicated and time consuming calculations required.

The program contains 11 frequently used formulas for analysis. You select the one you need from a menu and simply fill in the blanks. The program does the calculations and provides you with a detailed report. These are some of the formulas included:

- How to reach a savings goal.
- Should you fix your car or buy a new one?
- Which will generate more income: an IRA or savings account?
- How much will you withdraw monthly at retirement.
- The cost of loans with variable rates.
- A schedule of loan payments.
- How much will you be worth in the future?
- What is the actual yield of any interest rate?
- Loan interest costs and payment amounts.
- The penalty payments for early withdrawals.
- How much can you borrow?

The best financial decisions are made when you can test a range of possibilities. For example, what if interest rates change, if costs go up, if the market drops? Money Power lets you test different possibilities before you make the decision.

System requirements: IBM PC, Tandy and compatibles require 256K, DOS 2.1 or higher; Apple IIe, IIc, IIGS, and compatibles, 128K ROM, ProDOS; Commodore 64 or 128.

At EXPERT SOFTWARE our goal is to create the best productivity software at the best prices. We also believe in adding value to our packages.

That's why you'll always find an extra disk enclosed. So you can save your files without having to buy a data disk. (Most Expert Software programs come with a disk for IBM, Apple and Commodore computers. Simply reformat the one that's not compatible for your computer and use it for data.

That's why you get a free program every time you buy two Expert Software programs. Simply mail the coupons enclosed in each package for your free program. (Instructions on each coupon.)

That's why you get clear, concise manuals with each program. You won't find text files on disk or a couple of hastily prepared typed pages. We believe you deserve professionally written and produced manuals so you can find the information you need quickly.

We hope you like Expert Software and will look for new programs next time you visit your Expert Software retailer.

Free Software Coupon
